## MACLEAN POWER SYSTEMS RE-LAUNCHES SILICONE TRANSMISSION INSULATOR BRAND

*APEX Insulator Systems Offer Complete Solutions and Proven Performance*

YORK, SC – May 04, 2010 – MacLean Power Systems, a MacLean-Fogg Company, announced today that it has re-launched its silicone rubber transmission insulator product line under the brand name APEX™ Insulator Systems. The APEX™ Insulator Systems family of products and services include suspension and post insulators, insulator assemblies and services for transmission applications. The newly branded APEX™ Insulator Systems is designed to meet growing customer needs by providing the equipment and value-added services from the tower to the conductor.

The APEX™ Insulator Systems for transmission applications feature two efficient production platforms: modular production for custom designs and special applications from 69kV to 765kV and molded production for cost-efficient, high volume needs from 69kV to 161kV. The system also includes transmission suspension and tension insulators; transmission line post insulators; braced post insulators and load curve systems; complete insulator and hardware assemblies; as well as advanced engineering solutions and custom packaging.

“The significant advantages of the APEX™ Insulator Systems brand has been one of the industry’s best kept secrets,” explained Tom Smith, President of MacLean Power Systems. “The MPS transmission insulator systems product line has a long history of industry firsts in technical innovation and has been field-tested for 25 years, especially in high voltage and extra high voltage applications. We felt the time was right to package the best in transmission products and services under one brand umbrella to give our customers a proven and robust transmission insulator line of products and services they can’t get anywhere else,” Smith added.

### About MacLean Power Systems

Privately-held MacLean Power Systems, a MacLean-Fogg Company, is a worldwide leading manufacturer of products used by utilities for building communication, transmission and distribution lines and power substations. With global raw material sourcing capabilities, MPS produces over 10,000 items for the Power, Communication and Civil construction markets. Through innovation, quality and service, the MPS mission is to provide products and services that support the delivery of reliable power.
