

Adjustable Guy Deadend

Features

- New wedge style guy wire deadend uses three wedge grips to terminate guy wire
- Easier and quicker to install vs. formed wire units
- Attaches directly to the Round Corner Square (RCS) power shaft transmission screw anchor extension with the shackle for rapid installation
- Labor saving: no need to disassemble nuts the length of the hardware like adjustable "U-bolt" type systems
- Lifting eye is integral to the spreader body for attaching the come-a-long
- Non-adjustable for tower connection
- Nuts are secured in position with lock washer system
- For 1-1/2", 1-3/4" and 2" RCS shaft screw anchors
- Connection systems can also be provided for non-screw anchor applications such as for grouted thread bar anchors in rock

Catalog number		Shackle	Weight in Pounds
Guy for 5/8" Wire	Guy for 3/4" Wire
