

POLE STEP FOR HOLLOW POLES

OVERVIEW

The Pole Step catalog #SI-4040 from MacLean Power Systems is built for use on hollow steel and composite poles. Designed to install easily into a standard 1-inch hole while giving linemen a secure, stable step. With a cast aluminum body, strong grip surface, and a large boot keeper, it provides dependable performance in the field.

KEY FEATURES

- **Large Boot Keeper:** Keeps boots secure while climbing
- **Integrated Anchor Point:** Adds an extra level of safety on the pole
- **Grooved Step Surface:** Improves traction in all conditions
- **TDG-Coated Hardware:** Helps protect against corrosion and extend service life
- **Standards Compliance:** Meets ANSI Z359.18, OSHA 1910.24, and NESC Rule 261N

TECHNICAL HIGHLIGHTS

- Designed for hollow steel and composite pole applications
- Cast aluminum construction balances strength and weight
- Durable design built to handle everyday field use
- Focused on improving safety and stability for linemen
